## TRANSNATIONAL MEETING IN MADRID, SPAIN

The fourth transnational meeting took place in Madrid, Spain on October 20th and 21st, 2022. Representatives of organizations and institutions from Centro Sportivo Italiano Rome, Italy, Scuola Centrale Formazione, Bologna, Italy, Iasis Amke Athens, Greece, Solidaridad Sin Fronteras, Madrid, Spain, Kreissportbund Rhein-Erft e.V. Germany, VEST Institut für berufsbezogene Weiterbildung, Vienna, Austria and LAG AGRO LEADER, in these two days exchanged experiences from the previously conducted international training and local training for educators for children in early childhood, as well as they discussed the creation of recommendations to relevant institutions and organizations to promote and advance physical activity and a healthy lifestyle for proper growth and development to the children. LAG AGRO LEADER participated in this meeting with representatives from the Ministry of Labor and Social Policy of N. Macedonia.

- Multiplier Events
- Educators training experience
- Upcoming events

Co-funded by the  
Erasmus+ Programme  
of the European Union

# Multiplier Events

## **SOLIDARIDAD SIN FRONTERAS**

The action event, "Health and Sport in Early Childhood Education," was held on November 25, 2022, at the City Council of Leganés. The event was attended by 24 participants, including trainers, social mediators, educators, and child workers from various social organizations working with children. Participants were asked to take part in a round table where they discussed the project and exchanged good practices with other professionals. The participants themselves were involved in the implementation of some of the activities proposed by SSF in order to gain first-hand experience. All participants highly appreciated the materials and declared their intentions to implement them within their organizations and/or services.

"It is very important that public administrations are aware of these European projects and similar initiatives as we are also a consultative service for professionals and need to have more tools, such as the ones produced within the EECEME project, to facilitate them to interested people."

## **IASIS-26 NOVEMBER 2022**

The event: "Early childhood education and sport" took place in the IASIS NGO'S Day Center. The event was attended by 20 participants including trainers, social mediators, educators and child workers coming from or working in organizations working with children

The training resources for qualified childcare providers were given with the goal of enhancing the participants' professional capabilities in order to support young children's development of motor, cognitive, and mobility skills and an active, healthy lifestyle. Participants also had the chance to share best practices with other professionals regarding healthy practices for children and sports.

## LAG AGRO LIDER- NOV 25TH 2022

Local Action Group Agro Lider in cooperation with the High School "Orde Chopela"- Prilep organized an event named "Sports and healthy food for a happy childhood". The event took place in one of the city center squares where the children enjoyed several sports activities, and learned about healthy food through art activities. This local initiative is the result of the devotion to contributing to and promoting an active and healthy lifestyle for children.

## IREA AND SCF

On the occasion of World Children's Rights Day, Fondazione IREA IREAI - a partner with Scuola Centrale Formazione (SCF) of the Erasmus Sport EECEME project - organized a series of events "WELL-BEING, MOVEMENT, AND DISCOVERY" enhancing in its own context the practices learned to promote positive values and well-being through sports in early childhood.

# Early childhood educators training experience and upcoming events

"The EECEME project sports activities are designed to learn kids to play and enjoy physical activities while at the same time, strengthening their motor and social skills and improving their self-esteem."

"EECEME project' activities for kids are focused on the development of knowledge, skills, problem-solving, and dispositions, which help children in early childhood to think about and also understand the world around them. "

Implementation of the EECEME training course strengthens the professional skills of early childhood educators, encouraging them to implement the EECEME program for kids. It is a great way for kids to develop creativity, develop body strength, develop social skills, release energy and enjoy in sport activities!
